

MESSAGE FROM THE PRESIDENT

In this issue of ROUNDS, we have the opportunity to review the recent celebration of the 100th year anniversary of HFH. Alumni from past and present generations spent the weekend of Oct 9th reliving past memories of theirs and colleagues personal achievements during their time at HFH. It also was an opportunity to rekindle old friendships and make new acquaintances in the family of HFH.

Lawrence Mitchell, M.D.

The weekend started out with a welcome reception at the Detroit Historical Museum on Thursday evening. The location was timely as they currently have a special exhibit on the 100th year anniversary of HFH. This allowed alumni to trace the history of its ground breaking successes, distinguished alumni, and contributions both medically and economically to the Detroit area. If you have not yet viewed this exhibit and live locally, you may wish to do so.

On Friday the Medical Association presented an educational conference on a century of innovations and advancements pioneered

CELEBRATING 100 YEARS OF EXCELLENCE

Henry Ford Health System hit triple digits this year, celebrating its 100th birthday. The Baldrige award-winning Henry Ford Health System started with automotive icon Henry Ford, who opened the 48-bed Henry Ford Hospital in 1915. We've marked the centennial throughout the system this year with a number of celebrations for our physicians and staff, culminating with the Jubilee Reunion and Gala held this past October. Almost eight-hundred current physicians and alumni gathered in Detroit for the 3 day event. For those of you who weren't able to make the trip we wanted to share some of the event highlights, and for those in attendance this issue of ROUNDS will likely remind you of how much you learned and how much you enjoyed reconnecting with old friends and colleagues.

One of the highlights of the Reunion was the chance to visit the Detroit Historical Museum, which marked our anniversary with a special exhibit exploring the system's 10 decades of history. Besides tracking the growth of the system the exhibit also notes some clinical milestones, including the

hospital's distinction of "being the first in the country to use purified heparin to treat blood clots, and one of only a few U.S. hospitals chosen as a national test location for the first clinical trials

involving penicillin" according to the museum. A few more accomplishments of note are included below, and on the following pages you'll have the chance to see photos from the exhibit and opening reception held at the DHM.

Wright Lassiter III and his wife Cathy attended their first Jubilee Reunion and Gala held since Lassiter became the President of HFHS in December 2014

HENRY FORD HEALTH SYSTEM'S FIRST 100 YEARS

A trip through time

1910's - The first patient with a documented medical record at Henry Ford Hospital was seen on July 13, 1915.

1920's - The Henry Ford Hospital School of Nursing and Hygiene opened in 1925. Students accepted into the tuition-free school lived free-of-charge at the Clara Ford Nurses Home.

1930's - In 1939 Surgeon-in-Chief Dr. Roy McClure developed the innovative practice of adding iodine to kitchen salt in order to prevent the development of thyroid-related goiters.

1940's - Dr. Conrad Lam and then-resident Dr. Edward Quinn administered penicillin to 40 patients at Henry Ford Hospital as part of the national clinical trial to find a new drug to treat infections.

1950's - Dr. James T. Barron partnered with the medical and engineering staff of the Chrysler Corporation in the design of the Barron Food Pump, which led to a reduction of patient deaths due to ulcerative colitis.

1960's - Dr. Boy Frame of Internal Medicine started the Bone & Mineral Disorders Clinic. His research team became internationally known for identifying osteoporosis and its treatment.

1970's - The seven-story Benson Ford Education & Research Center was built so physician-researchers could work closely with laboratory research scientists. The building opened in 1977 with a dedication by President Gerald Ford.

1980's - Drs. Fred Whitehouse and Dorothy Kahkonen were the second in the country to administer human insulin to a patient with diabetes.

1990's - The first successful transplant of the Acorn CorCap Cardiac Support Device was conducted at Henry Ford Hospital by cardiothoracic surgeon Dr. Robert Brewer.

2000's - Cancer surgeon, Dr. S. David Nathanson, pioneered the use of sentinel node biopsy to detect the spread of breast cancer to the lymph nodes.

2010's - Henry Ford Hospital/Henry Ford Health System becomes the only organization in the U.S. to win all five major health care quality awards: Foster G. McGaw Prize (2004); Joint Commission Ernest Amory Codman Award (2006); American Hospital Association's McKesson Quest for Quality Prize (2010); Joint Commission's John M. Eisenberg Award (2011); Malcolm Baldrige Award in 2011.

The Jubilee began with an opening reception at the Detroit Historical Museum where guests had the opportunity to tour the special exhibit, "Henry Ford Health System: 100 Years Measured in Life," in addition to the museum's permanent collection.

The Allesee Gallery of Culture at the DHM allows visitors to explore the people and places that are "distinctly Detroit" - and was a perfect place for friends, and colleagues like Barbara Tilley, Ph.D. and Howard Duncan, M.D. to begin the weekend's festivities.

CEO Nancy Schlichting was in attendance, accompanying alumni and guests on tours of the HFHS special exhibit. During her tenure Ms. Schlichting has built an impressive legacy; she is credited with improving operations and market reach, helping Henry Ford win the 2011 Malcolm Baldrige National Quality Award, and opened the Henry Ford West Bloomfield Hospital in 2009.

When Ronald Strickler, M.D., Gregory Goyert, M.D., and Adnan Munkarah, M.D. left for the reception they probably didn't realize they had spent the day working inside a historical landmark - less than two years ago Henry Ford Hospital was added to the National Register of Historic Places.

SYSTEM WIDE CME EVENT HELD DURING JUBILEE: *A Century of Innovations and Avancements in Care*

In addition to catching up with old friends and colleagues, attendees at the Jubilee had the chance to participate in system wide CME entitled “A Century of Innovations and Advancements in Care” along with a number of individual Department & Specialty CMEs offered the following day.

DEPARTMENT AND SPECIALTY CME PRESENTATIONS

GYNECOLOGIC CANCER SURGERY AT HFHS

presenter

Thomas E. Buekers, MD
Division Head, Gynecologic Oncology

RADIATION ONCOLOGY: INTEGRATING “HIGH TECH” WITH “HIGH TOUCH”

presenter

Benjamin Movsas, MD
Chairman, Dept. of Radiation Oncology
Herndon Chair in Oncology Research

THORACIC SURGERY: HENRY FORD APPROACH

presenter

Zane Hammoud, MD
Chief of General Thoracic Surgery

MILESTONES IN ROBOTIC KIDNEY SURGERY AT HFH

presenter

Craig Rogers MD, FACS
Director of Renal Surgery
Director of Urologic Oncology

THE ROLE OF ROBOTIC SURGERY IN UROLOGY: PAST, PRESENT, AND FUTURE

presenter

Mani Menon, MD
The Raj and Padma Vattikuti Chair in Oncology
Director, Vattikuti Urology Institute

THERAPEUTIC ENDOSCOPY: FANTASTIC VOYAGE NOW A REALITY

presenter

Robert Luis Pompa, MD
Gastroenterology

BUILDING A WORLD CLASS CANCER CENTER AT HENRY FORD: CANCER SURGERY

presenter

Steven N. Kalkanis, MD

If you weren't able to attend the CMEs you can view and download the presentation slides and videos at henryfordhealthsystem.com/alumnirelations

2015 HFMG JUBILEE GALA

The weekend concluded with a gala celebration on Saturday evening. The MGM Grand Detroit provided a beautiful venue for friends and colleagues to reconnect, and included award presentations for Distinguished Alumni, Distinguished Career, the Fred W. Whitehouse Award, and many others. A full list of the honorees is below:

HENRY FORD MEDICAL GROUP

Fred W. Whitehouse Distinguished Career Award

Stanton B. Elias, M.D.

Special Recognition Award

James M. Connelly

HENRY FORD MEDICAL ASSOCIATION

Distinguished Alumni Award

Fred W. Whitehouse, M.D.

Distinguished Career Award

Robert A. Chapman, M.D.

Stanton B. Elias, M.D.

Gregory D. Krol, M.D.

Lawrence C. Mitchell, M.D.

Mark L. Rosenblum, M.D.

Richard E. Smith, M.D.

Gary B. Talpos, M.D.

Dr. John Popovich, Dr. William Conway, and Dr. Donald Ditmars spent time enjoying the company of Dr. Donald Schwing, who came to Henry Ford in 1948 for his internship and residency. It was a pleasure to welcome Dr. Schwing as the oldest alumnus who attended the Jubilee Reunion and 100th Anniversary Gala.

Congratulations to all of the 2015 award recipients!

HENRY FORD HEALTH SYSTEM LAUNCHES ALUMNI PROGRAM

The Development Office, in collaboration with the Henry Ford Medical Group, launched a new Alumni Relations program this September, the latest effort in a long tradition of excellence in physician education. At the core of that education are the significant relationships developed between department chairs, staff, residents, and fellows. Relationships that will be continued and strengthened through increased connection, communication, and engagement initiatives for alumni at the department and Henry Ford Medical Group level, and between alumni physicians for networking, referrals and professional growth.

Clark Dawood, a Detroit area native joined HFHS in September to lead the Alumni Relations program. Clark is coming home to the Detroit area from California and has many years of experience working in Higher Education and Non Profit Board Management. In his most recent role as an Associate Dean at Stanford he oversaw a large staff, a number of outreach and engagement programs, and acted as liaison to many University departments.

“I’ve been asked a lot in the last month ‘What is Alumni Relations?’ and almost always my answer is ‘What do you want it to be?’, because what I’ve found is that efforts to connect with alumni happen now, and in some places they happen really well, but every Doctor, Department Chair, and alum of the Resident program I’ve talked to so far has a wish list, something they want to see done better. Right now that’s my focus. To find those common needs across the system, create better

systems to support, communicate, connect, and engage people in new, but equally valuable, relationships with HFHS both as alumni and professionals.

“I’d invite alumni to connect with us by updating their contact

information, reminding others to do the same, and to visit www.henryford.com/alumnirelations to learn more about upcoming events, sponsored outings, and professional development opportunities.”

Clark Dawood, the new Manager for Alumni Relations can be contacted at 313-876-9871 or at cdawood1@hfhs.org and welcomes your comments and suggestions!

For more information, contact Alumni Relations at <http://www.henryford.com/alumnirelations>

HFHS JOINS GLOBAL 'GIVING TUESDAY' MOVEMENT

Henry Ford Health System's (HFHS) Office of Philanthropy invited the HFHS community to be a part of the Giving Tuesday movement for the first time this year, engaging employees, physicians, and the Metro Detroit area for one common purpose: to celebrate generosity and to give.

Now in its fourth year, #GivingTuesday is a global day of giving fueled by the power of social media and collaboration. Created in 2012 by the 92nd Street Y - a cultural center in New York City built around the values of service and giving back - and observed on the Tuesday after Thanksgiving, following the

widely known shopping events "Black Friday" and "Cyber Monday". #GivingTuesday has come to be seen as a "kick off" to the charitable season, when many focus on holiday and end-of-year giving. Giving Tuesday harnesses the potential of social media and the generosity of people around the world to bring about meaningful change in their communities; providing a platform to encourage the donation of time, resources and talents to address local challenges. It also brings together the collective power of a unique blend of partners— nonprofits, civic organizations, businesses and corporations, as well as families and individuals—to encourage and amplify small acts of kindness.

Last year 30,000 organizations - nonprofits, civic organizations, businesses and corporations, as well as families and individuals - in 68 countries came together to celebrate the day. In this inaugural year HFHS participated by supporting three

of the System's community health initiatives: SandCastles Grief Support for Children and Families, School-Based & Community Program fund. In the week leading up to #GivingTuesday the Development Office shared videos, patient stories, and information about the positive impact these programs have in the Detroit area. On December 1st employees and community partners took to social media sharing posts, tweets and videos illustrating the hope, kindness, and healing at the heart of the System's mission. Throughout the day the more people shared our story, the more acts of generosity were inspired, which resulted in over \$25,000 being raised to expand and enhance the work being done by SandCastles, SBCHP, and Game on Cancer. #GivingTuesday served as a powerful reminder that together we can make a difference in the world each and every day. For more information or to learn more about how you can get still be involved in supporting these efforts please visit www.HFGivingDay.com.

SEE NEXT PAGE to find out more about the programs supported during HFGivingDay.

HFHS 'GIVING TUESDAY' MOVEMENT *(continued)*

SandCastles

SandCastles Grief Support Program, established in 1997 by Henry Ford Hospice, focuses on the belief that every child and teen deserves the opportunity to grieve in a supportive, nurturing environment. Grieving youth ages 3 to 18 are offered a safe place where they can interact with peers who have experienced similar losses, learn life-long coping skills, and most importantly begin a healthy healing process. Participants learn how to identify and express their feelings and in doing so, empower one another. Peer support groups help children and teens understand that they are not alone in their grief. Visit their website (www.aboutsandcastles.org) and like them on Facebook www.facebook.com/HenryFordSandCastles/

School & Community Based Health Program

The Henry Ford Health System School-Based and Community health program services are aimed at achieving the best possible physical, intellectual, and emotional status of children and adolescents by providing services that are high quality, accessible, and acceptable to youth. Our Mobile Medical Units, affectionately known as the Hank and Clara buses, provide primary care, preventive care, comprehensive health assessments, asthma, vision and hearing screenings, medication, immunization, treatment of acute illness, co-management of chronic illness, health education and mental health care. The goal of the School-Based and Community Health Program is to meet the students and families where they are and to reduce their many barriers to receiving health services. You can find out more by visiting their website (www.henryford.com/body.cfm?id=47741)

Game On Cancer

Game On Cancer is an unprecedented initiative designed to significantly raise awareness and support for the fight against cancer. All funds raised during the campaign go directly to the patient services fund, which can be used to provide cancer patients with subsidies for medication, travel costs, childcare, groceries, and any number of needs they might have while in treatment. The Josephine Ford Cancer Institute benefits over 14,000 cancer patients annually, including patients from throughout the nation and at the world. Team up with the Detroit Lions and the Josephine Ford Cancer Institute to tackle cancer once and for all! Visit their website (www.henryford.com/game_on_cancer.cfm?id=59472) and like them on Facebook (www.facebook.com/GameOnCancer)

There's Still Time to Pledge to the Employee Giving Campaign

Pledges are still being accepted for 2016, and are greatly appreciated. For employees who have yet to fill out their forms, log in to HR Connect and click on the Employee Giving link at the bottom of the page. You may also contact the Development Office at 313.874.7212 or rseller2@hfhs.org to give via phone or email. For more information, and to read testimonials from fellow employees who give, <https://onehenry.hfhs.org/news/Pages/Still-time-to-pledge-to-Employee-Giving.aspx>

PRESIDENT'S MESSAGE *(Continued from Page 1)*

by individuals and departments associated with HFH. The session highlighted medical discoveries, clinical advancements, and the latest in transitional research across a broad spectrum of specialties. The morning session included advancements in robotic kidney surgery, multi-visceral transplantation, and innovative interventional gastrointestinal procedures. The afternoon session included pioneering techniques and procedures in neurosciences, the Center for Cancer Surgery and the Center for Structural Heart Disease. The presentations were outstanding, advancements and new technology amazing, and opportunities for improved patient care reassuring. Listening to the various speakers and the new advancements pioneered at HFH makes one proud to be part of a system which advocates medical and technological research which is being used internationally to enhance patient care.

Saturday provided an opportunity for individual departments to hold CME programs to update individuals on advancements in their specific specialty. This was followed Saturday evening by the Jubilee Gala at the MGM Grand attended by approximately 750 people. After comments from the leadership team of the HFHS, awards were presented to various individuals for their long standing contributions to the HFHS. These included the Fred Whitehouse Award (Dr. Stanton Elias), Distinguished Career Award (Dr. Fred Whitehouse), and Special Recognition Award to James Connelly. Several Career Achievement Awards were also presented. I,m sure a good time was enjoyed by all all attendees, and anticipation for our next five year reunion.

Sawana C Mitchell

DR. RIVAL RETIRES AFTER 46 YEARS OF SERVICE

This past summer Henry Ford Health System recognized Dr. Jan Rival's 46 years of distinguished service in the Department of Medicine. Respected by his peers, admired by his students, and beloved by his patients Jan was celebrated at a reception held Wednesday, June 17.

Jan was raised and educated in Czechoslovakia and earned his medical degree, summa cum laude, from Koemnski University in Bratislava.

He completed a fellowship in cardiology at Philadelphia General Hospital and the Wayne State University School of Medicine.

Dr. Rival joined Henry Ford Hospital in 1969 and was a division head in the Department of Internal Medicine from 1985 to 1996. He served as president of the Henry Ford medical

Associatoin from 2000 to 2007 and was the recipient of the Fred W. Whitehouse M, MD Distinguished Career Award in 2008, which recognized his exemplary service and record of excellence that epitomizes the mission of the Henry Ford Medical Group.

In addition to his accomplishments at Henry Ford, Dr. Rival served as governor of the Michigan Chapter of the America College of Physicians (ACP) which presented him with its Laureate Award and Lifetime

Achievement Award. In 2015 the ACP elevated him to Mastership, the highest honor bestowed upon a member of the College. He is also a fellow in the American College of Cardiology, and is the author or co-author of more than 40 publications and abstracts.

Jan's contributions to the system and to the field of medicine extend beyond his own career through his work as an educator, teaching and leading countless students and future physicians. For many years Dr. Rival was a clinical Associate Professor of medicine at the University of Michigan, where he received its Outstanding Teacher Award in 1994. His students and patients honored him by creating a traveling scholarship award in his name. This award is presented annually to an exceptional resident within the Department of Internal Medicine. In addition, the Henry Ford Health System presents the Jan Rival Outstanding Resident Award on an annual basis to a physician-in-training selected from all of the System's residents.

Henry Ford Health System is honored and humbled to have had such a distinguished and respected physician as part of our family, and look forward to his continued involvement and service as a member of the Alumni Association, the education of our physicians in training, and an annual Grand Rounds event.

IN MEMORIAM

Carlisle K. Parker, Jr., M.D.

Carlisle K. Parker, Jr. M.D., Otolaryngology resident from 1957 to 1961 and Medical Group physician from 1963-65 at Henry Ford Hospital passed away April 5, 2015 at the age of 84. Dr. Parker entered the United States Air Force in 1961 and was stationed in Wichita Falls, Texas for two years before returning to Henry Ford and was on the junior staff. In 1965 he opened a private practice in Toledo, Ohio where he continued to practice until his retirement in 1996.

February is American Heart Month!

Heart disease is the leading cause of death for both men and women. To prevent heart disease and increase awareness of its effects, Henry Ford Health System is proudly participating in American Heart Month. Throughout the month of February, Henry Ford Heart & Vascular Institute will be offering a number of Heart Month events and educational talks. To learn more about an event near you, visit henryford.com/hearthealth. There you can take our newest Heart Disease HealthRisk Assessment, an interactive online health risk assessment using a medically validated, evidence based, assessment that calculates your risk using medical and lifestyle factors to generate personalized recommendations.

Controlling and preventing risk factors is also important for people who already have heart disease. This may include parting with old habits and trying new things. The Henry Ford Heart & Vascular Institute recommends the following strategies to help you get started:

Develop a plan that works for you: Make your own eating and activity plan, or modify expert tips to fit your lifestyle. Find out what works best for you and do it your way.

Get real: Set goals that are realistic and attainable. Changing too much too fast can leave you feeling overwhelmed and frustrated.

Set yourself up for success: Make your surroundings healthy-living friendly by stocking up on healthy foods and finding friends who enjoy the same activities as you.

To learn more about our upcoming Heart Month events, visit henryford.com/hearthealth. To make an appointment with a Henry Ford cardiologist or vascular expert call 1-844-725-6424.
