

THE NEXT GENERATION OF MEDICINE

at Henry Ford Macomb Hospital

“It is critically important to have the proper space and technology for our patients. Surgery has changed and we cannot continue to operate in the same small facilities we currently have – we have to move with technology or technology will leave us behind.”

STEVEN HARRINGTON, M.D.
Medical Director, Cardiothoracic Surgery
Henry Ford Macomb Hospital

INNOVATION

As a community, you have told us what you need. And we are responding.

Just 20 years ago, it would have been difficult to imagine open-heart surgery being performed without actually opening the chest, or a hip being replaced and the patient being sent home the next day. Surgeries that took hours in the OR and days of hospitalization to recover are now being performed quickly on an outpatient basis.

These and other innovative, life-saving treatments are taking place every day at Henry Ford Macomb

Hospital, where we continue to make new investments – staying true to our vision to deliver better, faster and safer care to the community we serve.

This includes the recent renovation of our first floor Surgery and Endoscopy Center, where we expanded capacity for new procedures and made enhancements for patient privacy and convenience. This was the first phase in a larger plan to grow our surgical space and capabilities, so that we can keep up with the growing needs of our community.

HENRY FORD MACOMB
HOSPITAL IS A LEVEL II
ADULT TRAUMA CENTER,
which includes dedicated, onsite trauma surgeons 24/7.

HFMH SURGEONS HAVE THE HIGHEST RATING FOR CARDIAC SURGERY

available nationally from the American College of Thoracic Surgeons. Named one of the top 50 cardiovascular hospitals in the nation by Truven Health Analytics.

Our surgeons have received recognition from Blue Cross Blue Shield and Aetna for
**SUPERIOR QUALITY, SAFETY AND COST CONTROL FOR
CARDIAC AND JOINT REPLACEMENT SURGERY.**

INSPIRATION

Neighbors Caring for Neighbors

We have worked tirelessly to build the right team and give them the right tools, so that we can provide world-class surgical care – right here in Macomb. Expansion of the operating space and accompanying services is critical for providing the highest possible quality of care to our patients, while also ensuring we can continue to recruit, retain and educate top surgeons for our community.

“Serving the Macomb County region is a privilege that we do not take lightly.”

A TALENTED 21-YEAR-OLD STUDENT ENROLLED IN A CULINARY COLLEGE HAD DREAMS OF BECOMING A MASTER CHEF.

But something just didn't feel right. Everything she did took more effort than it should. She felt tired all the time – winded, out of breath, with a racing heartbeat. She went to see her family doctor, who examined her, noticed a new heart murmur and referred her to a cardiologist. After further testing, she learned that she had a leaking heart valve, which would typically require open-heart surgery. She was worried that with such a major, life-changing surgery, she would watch her culinary dreams fade away.

Fortunately, she was referred to Henry Ford Macomb Hospital, where Dr. Steven Harrington performed robotic cardiac surgery during her semester break. The aspiring chef returned to her classroom kitchen without missing a single day of her culinary journey.

“We have always been the community leader in offering new services and technologies. To maintain our leadership role we must expand our Surgery Center and services to allow for future growth and to stay in the leadership role the community expects and recognizes.”

DR. HAROLD GALLICK
Division Chief, Surgery
