| | Audience: Medical Students | | |
| | Key Words: scientific investigation; clinical scientists; abstracts; presentations; forum; conference presentation | | |

Background

To provide medical students with the opportunity to gain further experience into scientific investigation, to develop competence in research and dissemination of findings.

Policy

Research is a high priority for Henry Ford Health System and an expectation in all graduate medical education programs. Henry Ford Hospital is an academic research institution that desires to engage the medical students in educational research programs under the direction of HFHS Principal Investigators. HFH aims to prepare medical student to be clinical scientists, successfully match into residency training programs that demand research productivity and to participate in national, regional and state meetings through abstracts and presentations.

Research Forum The annual Medical Education Research Forum is open to Wayne State University medical students, residents and fellows participating in HFH medical education programs. Awards are presented in the areas of medical and educational research, quality improvement, reducing healthcare disparities and case reports.

Conference Presentations HFHS encourages medical students to conduct research and disseminate findings to further the profession and advance knowledge. Funding may be provided to support abstract and/or poster preparation and travel to present research (not case reports), where the student is the first author, based on the judgment and discretion of the HFMG Senior Staff mentor:
