

Accreditation Council for Graduate Medical Education

Plastic Surgery Case Logs

Program Data Report

Prepared by: Department of Applications and Data Analysis

I. Program Level Report Tables

A. This table provides summary statistics at the program level.

The minimum required values specified by the RRC are given.

B. Descriptive statistics have been carefully chosen to provide the most useful information for judging performance at the program level.

i. "Prog AVE" - The average number of procedures performed per resident in the specified program.

ii. "Prog MIN" - The minimum number of procedures performed by a resident in the specified program.

iii. "Prog MED" - The median value among resident procedure counts in the program.

iv. "Prog MAX" - The maximum number of procedures performed by a resident in the specified program.

v. "Prog PERC" - The percentile is a statistic that shows how a program compares to all other programs in the country.

Percentiles range from lowest (1) to highest (99) with the average equal to 50.

vi. "Natl Prog AVE" - As an additional comparison measure the overall national program average is included.
