True or False

6.) Exposure to bloodborne pathogens can occur when you are punctured, cut, or splashed by items contaminated by another person's blood or body fluid.

True or False

7.) Transmission-Based precautions are necessary when additional measures above Standard Precautions are needed to prevent transmission of an organism.

8.) Transmission-Based Precautions include _____, _____, and _____ precautions.

True or False

9.) Sharps containers should be locked and discarded when $\frac{3}{4}$ full.

True or False

10.) Medical waste includes any material that can be squeezed to express a drop of blood or Other Potentially Infectious Material (OPIM) or can be flaked off of the surface.

HENRY FORD
MACOMB HOSPITALS

Student Orientation Quiz
For
Emergency Preparedness, Environmental & Personal Safety
Based on WOW Orientation

Student Name: _____ School: _____
Program: _____ HFMH
Department: _____
Date: _____

1. Students are the eyes and ears of the Safety & Security Department, and as such, should (*circle the statement that **does not** apply*):
 - a. Be aware of their surroundings/report suspicious activity.
 - b. Keep belongings/valuables in a secure location/locker.
 - c. Leave office doors open for everyone to have access.
 - d. Always wear the photo identification badge from their school.
2. The following rules apply to all students working/studying at the hospital (*circle the rule that **does not** apply*):
 - a. Firearms or weapons are not allowed on the property.
 - b. Smoking is allowed in designated areas.
 - c. No latex balloons are allowed – only Mylar.
 - d. No alcohol is allowed for personal consumption by students.
3. Students can get information about the chemicals they will be in contact with from (*circle the information source that **does not** apply*):
 - a. The Material Safety Data Sheet.
 - b. The label on the container.
 - c. The International Center for Chemical Information.
 - d. Their supervisor/instructor.
4. Students may be required to wear Personal Protective Equipment (PPE) in the area they are working/studying. Examples of PPE are (*circle the item that **is not** PPE*):
 - a. Gloves.
 - b. Goggles/face shields.
 - c. Lab coats.
 - d. Scarves.

5. Students may be required to work with sharps, e.g., needles, in the areas they are working/studying. Sharps must have engineering controls to protect the users. Examples of sharps are (*circle the item that is not a sharp*):
- Needles.
 - Scalpels.
 - IV sets.
 - Blood pressure cuffs.
6. Medical Waste must be segregated from other types of waste at a hospital. Examples of Medical Waste are (*circle the waste that is not medical waste*):
- Kitchen waste.
 - Sharps/needles.
 - Blood and body fluids.
 - Pathological waste.
7. These are the things a student would do to minimize exposure to radiation (*circle the item that does not apply*):
- Limit exposure time to the patient.
 - Stand close to the patient.
 - Wear shielding/aprons, etc.
 - Monitor their personal dosimeter readings.
8. Lasers may be used in the area students are working/studying. When using lasers, students must (*circle the statement that does not apply*):
- Wear appropriate eyewear with side protection.
 - Know lasers are in use because of proper signs.
 - Tell the Laser Safety Officer they wear prescription glasses.
 - Receive instruction from the Laser Safety Officer.
9. MRI Units give off a magnetic field that is very strong. Circle the item that **should not** be near the MRI Unit:
- Patient.
 - Regular oxygen tank.
 - Plastic backboard.
 - Tennis shoes.

10. National Emergency Management Color Codes

Fill in the Blank:

1. Code Red: _____
2. Code Blue: _____
3. Code White: _____
4. Code Pink: _____
5. Code Purple: _____
6. Code Black: _____
7. Code Gray: _____
8. Code Silver: _____
9. Code Green: _____
10. Code Triage – Internal: _____
11. Code Triage – External: _____
12. Code Orange: _____
13. Code Yellow: _____
