

The Eye, The Brain and The Auto
8th World Research Congress on Vision and Driving
Impact of Disruptive Autonomous Vehicle Technology on Health and Wellness
October 7-9, 2018

ABSTRACT SUBMISSION POLICIES & FORMATTING

Key Dates for the 2018 Abstract Program

February 1, 2018 Abstract submission entry opens

May 1, 2018 Abstract submission deadline

July 1, 2018 Abstract notification of acceptance

Abstract Submission Policies

- Work in an abstract must be approved by your Program Director.
- An abstract must be submitted with the intention that, if accepted, it will be presented by the First Author as a 20-minute Platform Presentation.
- All financial relationships with commercial interests relevant to the research reported in the abstract must be disclosed.
- Registration is not required to submit an abstract.
- If a submitted abstract is accepted for platform presentation, the first author will be eligible for up to three nights complimentary lodging.
- If rejected for platform presentation the organizers implore the program to submit the material as a poster.
- There is no limit on the number of abstracts that can be authored by an individual.
- There is a maximum of 2,500 total characters that includes all characters and spaces in the abstract's title, abstract body and image captions (maximum of 2 images). Images are not included in the character count.
- In formatting the abstract submission, we prefer the following headings:
 - Objective(s)
 - Methods or Design
 - Results
 - Conclusions

The Eye, The Brain and The Auto
8th World Research Congress on Vision and Driving
Impact of Disruptive Autonomous Vehicle Technology on Health and Wellness
October 7-9, 2018

ABSTRACT SUBMISSIONS

The 8th *The Eye, The Brain and The Auto* planning committee seeks high quality abstracts describing original, where possible unpublished, research results.

We invite your submission of:

- Abstracts related to the original direction of previous *The Eye, The Brain and The Auto* congresses on the relationship between vision and the safe operation of a motorized vehicle.
- Abstracts related to physiologic data sensing and collecting that the vehicle may be capable of gathering to the advantage of the occupant(s) and society.
Please think beyond alcohol vapor demobilization of the vehicle and narcolepsy detection.
- Abstracts outlining unique capabilities or opportunities autonomous vehicle technology might present that you wish to explore.
Please think beyond the obvious capability of conveying the blind to their doctors' offices.
- Abstracts from within the auto (human transportation) industry postulating questions that researchers in human sciences, or health care, or human physiology might address.
Please think beyond the challenges related to touch screen instrument panels for the visually impaired or the physically handicapped occupant.
- Abstracts related to research you have already accomplished, or will have completed by next October, and will be ready to present.

The 2018 Congress will be held October 7-9, 2018 at the Motor City Casino Hotel in Detroit, MI. In 1929, the world called our city ***Detroit the Dynamic***. The recent decade resurrection of the central city makes that approbation legitimate once again!

If this Congress intrigues you, the sooner you display your interest as a possible participant or your intention to submit an abstract the greater are your chances of a slot as a Panel Presenter.
