

# Hand & Wrist Program

**ALL FOR YOU**

# Hand and Wrist Care at Henry Ford

Hands and wrists are vital to our ability to work and play everyday. Our expert team of orthopedic and plastic hand surgeons specialize in treating the most complete hand and wrist conditions, even those that involve blood vessels or nerves. Our division prides itself on delivering leading-edge treatments such as wide-awake surgery and endoscopic surgery. These less invasive techniques can help you recover faster and lower your risk for complications.

Henry Ford Hospital, our Level I trauma center, has three hand and wrist orthopedic surgeons and three hand and wrist plastic surgeons who treat complex traumas. We also provide expert care for conditions that don't require surgery.

The most advanced orthopedic care is based in the latest research. Henry Ford hand surgeons are active clinical researchers in areas including hand trauma, carpal tunnel syndrome, arthritis, work-related injury and joint replacement. We regularly publish in peer-reviewed journals and follow patient outcomes to better inform our care.

All of our hand surgeons have had specialized hand surgery fellowship training in addition to their orthopedics or plastic surgery training. We diagnose and treat a variety of hand and wrists conditions, such as:

- Carpal tunnel syndrome
- Traumatic hand injury
- Simple and complex fractures
- Hand, thumb, wrist and elbow arthritis
- Wrist reconstruction
- Hand and wrist sports injuries
- Tennis elbow or golfer's elbow
- Trigger finger and tendonitis
- Lumps in the upper extremities
- Congenital Hand Conditions
- Soft Tissue Reconstruction/Microsurgery
- Upper Extremity Tumor/Other
