

## Follow Up Guidelines for Liver Transplant Recipients of the Henry Ford Transplant Institute

### Required visits to the clinic on K-16 at the Henry Ford Hospital Campus

*(Your doctor may require additional visits and lab tests)*

- Month One:** Two clinic appointments per week for blood draw and to see the Henry Ford transplant team
- Month Two:** One clinic appointment per week to visit the Henry Ford transplant team, and one blood draw per week, done at your local lab prior to your transplant team visit
- Month Three:** One clinic appointment every other week, and one blood draw per week at your local lab
- After Three Months:** Blood draws every 2-4 weeks at your local lab. Monthly clinic visits with the Henry Ford Transplant Team
- After 12 Months:** Blood draws every 2-3 months at your local lab; Visits with the Henry Ford Transplant Team every 4-6 months

**Based on your outcome, your local medical provider or your Henry Ford Transplant Team may find it appropriate for you to:**

1. Have more frequent visits and blood draws
2. Take infusions
3. Receive additional IV medication
4. Have additional biopsies of the transplanted liver of other procedures/imaging related to your transplant at Henry Ford Hospital

**You will have frequent changes in medications. You will need a support person with you during doctor visits to help take notes and remember all medication instructions.**
