

## Installing MyChart on Your Mobile Device

- Choose “App Store” (iPhone/iPad) or “Play Store” (Android) on your device.
- In the search bar, type “MyChart.”
- **iPhone/iPad:** If you’ve never installed MyChart before, you’ll click the “get” button to begin installation. If you’ve had MyChart on any other Apple device, you’ll see a cloud with the arrow down, meaning “download.” Whichever you get, “get” or download, click it to begin installation.
- **Android:** When the My Chart app appears as an option on your screen, click “Install.”
- Once the app is installed, the button will change to read “open.” Click it.
- After a brief welcome screen, you’ll be asked to enter the state where you see your healthcare provider. Enter “Michigan.” You’ll then see a list of providers. Scroll down until you see the Henry Ford Health System logo and click it.
- You may now sign into your MyChart account.
